Old Mill Creek

Why Legacy GreenBuilders?

Ongoing savings are an unseen benefit of your Legacy home and the market value that it builds for you. As experts in energy efficient construction, we know where tomorrow's standards are headed-and match or exceed them today. It's right for our clients, the environment, and the value of Your home.

Planning for the future, many options to accommodate a changing family are built right into every Legacy home. We include features that give the option to age in place without moving. After all, the true sign of a Legacy home is being able to enjoy it as long as you want.

Plus, Legacy's construction ethics attract craftsmen who take great pride in creating a home that will last, showcase their talents and protect the environment.

It's why people talk good about us behind our backs!
